

JAN. GUN SALE #211

The following Catalog is only a Guide, not a guarantee. We provide the best descriptions we can but in many cases, our opinions may not agree with yours, so we sincerely suggest that if at all possible, that you arrange to view the guns for yourself. If you are unable to do this you can perhaps make arrangements to phone us and ask for "JIM" Baggaley, who can help you out.

We often use the descriptions given to us by Consignors as we find that many times they are more expert in their particular field. If you cannot attend the Auction, we will accept Absentee Bids on your behalf. We will try to buy the item for you at the lowest price we can but we cannot guarantee that we will always be able to execute your bid.

If you are from another Country, please be sure that you can in fact import the items you are bidding on as we will charge you for the item & if we have to re-sell it you will be charged the commission for doing this. Please arrange the details with JIM before the Auction to avoid problems. If you have any questions about any of the procedures with the Sale of Guns, see if JIM can be of help.

We do not guarantee the safety of any of the firearms, and strongly suggest that if you intend to fire any gun it should be checked over by a competent Gunsmith.

In the case of ammunition & components, we tell you what we know about the items and try to give a Generous to you count. All reloads are sold as brass which you could unload.

Please Note!:You will see some guns designated as "Bill C-68, or Prohib. 12-6," which means that they can only be purchased by people who already own that type of firearm, unless they are being exported, which in that case there are other rules.
